FABLE 5.2 LANDED

9 NOV 2026

CLAUDE FABLE 5.2 · ANTHROPIC

Claude Fable 5.2 landed. Mollick calls it "almost" AGI

WHAT CHANGED

Anthropic released Fable 5.2 on 9 Nov for all users, with extra cybersecurity and biology safeguards. Outputs are up to 30% faster than 5.1. For most everyday work, Anthropic still recommends Opus 5.5.

WHY IT MATTERS

Mollick found the gaps were about judgement, not knowledge. Critics found errors, but "None of them asked whether the work was too long, too repetitive, or no fun."

> WHAT STAYS HUMAN
>
> **You can hand over the work. You still keep taste, judgement and sign-off.**

COPILOT COWORK · MICROSOFT

Copilot Cowork can now work in your own Edge browser

WHAT CHANGED

Cowork can use local Microsoft Edge to navigate sites, gather information, fill forms and complete supported actions on sites you are signed in to. Credentials and cookies stay on your device.

WHY IT MATTERS

A delegated task can now reach the websites you already use for work. Start with a bounded task you can inspect.

> WHAT STAYS HUMAN
>
> **You choose the sites and actions, and approve consequential steps.**

FOR Consulting · Finance · Legal · Public sector

IN COPILOT COWORK · MICROSOFT EDGE

GEMINI IN GOOGLE FORMS · GOOGLE

Gemini in Google Forms turns responses into next steps

WHAT CHANGED

Gemini analyses form responses by running Python code, finds trends and links between answers, and recommends next steps. Rollout began 2 Nov for eligible plans; Scheduled Release 19 Nov.

WHY IT MATTERS

Feedback and survey analysis can start inside Forms, with counts grounded in your response data.

> WHAT STAYS HUMAN
>
> **You decide what the responses support and which actions to take.**

IN GOOGLE FORMS

CURSOR

Cursor builds and hosts a working app from a description

WHAT CHANGED

Cursor can build a web app with a database and sign-in, then host it at a link you share. On all paid plans with cloud agents enabled. Nothing goes live until checks pass and you publish.

WHY IT MATTERS

People in sales, operations, legal or finance can make a team tracker or dashboard and share it with colleagues.

WHAT STAYS HUMAN

You approve publishing, who has access and how it handles work data.

FOR Operations Sales Finance Legal

IN CURSOR

PERPLEXITY

Perplexity teammates take on ongoing responsibilities

WHAT CHANGED

Perplexity teammates is in research preview for individual Max subscribers on the web. These agents hold ongoing responsibilities, coordinate tasks and use connected tools.

WHY IT MATTERS

Assign a recurring research or monitoring job with clear boundaries, then review what comes back.

WHAT STAYS HUMAN

You set the remit, access and escalation rules.

IN PERPLEXITY WEB

CHATGPT · OPENAI

ChatGPT dots reach Enterprise, Edu and Healthcare workspaces

WHAT CHANGED

Personal dots keep working on tasks between conversations. They are now available to eligible Enterprise, Edu and Healthcare workspaces. Admins can opt out before dots turn on by default on 18 Nov.

WHY IT MATTERS

Ongoing work can run under workspace controls, with data residency and Enterprise Key Management support.

WHAT STAYS HUMAN

Admins decide who can use dots. You decide what each dot is for.

IN CHATGPT ENTERPRISE | CHATGPT EDU

CLAUDE ENTERPRISE · ANTHROPIC

Claude Enterprise can tag AI spend to a client or matter

WHAT CHANGED

In beta, eligible Claude Enterprise organisations can tag projects with a charge code or client-matter number and see most spend by tag. Work outside a project is not tagged.

WHY IT MATTERS

Firms that bill by engagement can start allocating supported AI spend to the work it served.

> WHAT STAYS HUMAN
>
> **You choose valid codes and reconcile costs before billing clients.**

FOR Consulting | Legal | Finance

MICROSOFT TEAMS · MICROSOFT

Teams Workflows adds Copilot-powered scheduled prompts

WHAT CHANGED

AI Workflows in the Teams Workflows app offer customisable Copilot-powered templates and scheduled prompts for multi-step tasks. Admins control access through Teams app settings.

WHY IT MATTERS

A recurring update or routine process can run from a template instead of starting from scratch each time.

WHAT STAYS HUMAN

You set the inputs, the schedule and the approval points.

FOR Operations | Consulting | Public sector

IN MICROSOFT TEAMS | WINDOWS | MAC

GOOGLE MEET · GOOGLE

Google Meet can show your recording policy before people join

WHAT CHANGED

Admins can set a short policy notice, with a link, shown before joining a Meet call: always, or only when it is recorded, transcribed or has Gemini notes. Off by default.

WHY IT MATTERS

People know how a meeting will be captured before they join it.

> WHAT STAYS HUMAN
>
> **You decide when recording or AI notes are appropriate.**
